- FRENCH

NAHUEL GOLDY

SOFTWARE ENGINEER

EXPERIENCE

(Oct 2017 – present)

DATA MIGRATION & DEVELOPER (remote)

ATG - "Infoblox" project

Performed intensive Data Migration tasks, as well as integration development, daily interaction with the client and product demoing (within Salesforce platform).

(Jul 2017 – Sept 2017)

FULLSTACK DEVELOPER

HERMES ERP

Worked in both Frontend (Angular) and Backend (PhP) development of features on this old-to-modern-tech porting project.

(May 2017 – Dec 2017)

PRODUCT ENGINEER (freelance)

WHERE CAN I PARK?

As owner team's core member, I got deeply involved in design, architecture, analysis and eventually implementation of an Android app, an Ionic app, an Angular webapp and the API (Java) that served them all, as well as management of the dev process.

(Aug 2016 – Dec 2016)

ANALYST & DEVELOPER

CODES

I was involved in this project from its inception, from requirement collection, to analysis, design and utterly development (Backend, Java).

EDUCATION

(2013 – 2017)

SOFTWARE ENGINEERING (Bachelor + Master)

UTN frsf (Argentina)

Finished my engineering degree in highly-above-average time, with an average score of 87%. National Tech University (UTN, in spanish) is the most renowned engineering university in Argentina.

ADDITIONAL INFO

Willing to work remotely or relocate (no visa). Constantly exploring technologies through side-projects (MEAN stack, GraphQL, Docker, C#/.NET).
