Nahuel Sebastián GOLDY

**Software Engineer**

27 years old (11-Apr-1991).
Juan de Garay 1788, Coronda, Santa Fe, Argentina
Email : nahuelsg.64@gmail.com
Skype : nahuelsg_64

My name is Nahuel Goldy and I am a Software Engineer who currently lives in Coronda, Argentina, has been working on software development since 2015 and can perform as an all-rounder (frontend, backend, data). I consider myself flexible, pragmatic and a fast learner. To me, the most important part of development is to deliver added value and high quality solutions to the customer.

I like working in challenging environments that can help me grow and push my limits, in order to improve every time. I enjoy as well learning about new technologies. I have worked in different projects, with different technologies, frameworks and languages, so I have learned to adapt quickly. I stay proactive and I enjoy working as part of a team.

ACADEMIC FORMATION

2013-2017   **Software Engineering**
Santa Fe – Arg.   Universidad Tecnológica Nacional – Facultad Regional Santa Fe (UTN frsf).
+   Average score with/without failed exams: 87%/87%

Idiomas: **Español:** Native
     Ingles: advanced (spoken, read and written).

PROFESSIONAL EXPERIENCE

September 2017-May 2018	« **Infoblox: redesign and migration** » *(US based client)* Position: Data Migration specialist, Consultant, Integration developer Description: I was involved in heavy Data Migration tasks and also in rest endpoints development for Integration purposes, as well as interacting with the client, reporting and demoing. Tools/technologies: Salesforce, Pentaho BI, Apex, REST, MavensMate
October 2017	« **PF API loader app** » Position: Mobile (hybrid) developer Description: I developed an internal app for «**Where can I park?**» project, which automated the real-data population of some of its tables trought REST API calls. Tools/technologies: Ionic 2, Typescript, REST, MySQL
August 2017-September 2017	« **BAS: reporting services** » Position: .NET developer Description: I developed a set of PoCs for the client, who required a large number of Reports to update its prime-selling-system product, and set the foundations for this project going forward. Tools/technologies: Microsoft dev ecosystem (C#, VS, SQL Server)
August 2017-November 2017	« **Where can I park?** » Position: Android developer, Fullstack developer Description: I participated in the development of an Android (native) app for Parking services, as well as in the development of a webapp (destinated to parking-facilities owners) and a REST API (to support them both). Tools/technologies: Angular4, Java, Spring ecosystem, REST, MySQL, Android, JWT
February 2017	« **Tenis Criollo Score app** » *(variant of tennis with wooden paddles and smaller court)* Position: Android developer Description: I developed a native Android application to keep track of Argentinian 'tenis criollo' matches' score, as well as its statistics (ground strokes, serve, etc). Tools/technologies: Java, Android
August 2016-December 2016	« **Real-estate management system** » Position: Fullstack developer Description: I participated in the development of both the frontend side of this system (web application), as well as it's backend / database Tools/technologies: Java, MySQL, MVC, Primefaces, Bootstrap, Azure, JUnit

May 2015-December 2015	« **CoDes : managing sporting competitions** » Position: Analyst, Developer Description: my involvement started from the first stages of this project (gathering requirements, constructing use cases) to the later stages of development itself. Tools/technologies: Java, Hibernate, MySQL, MVC, Git, Trello

TECHNICAL KNOWLEDGE AND SKILLS

- Programming languages: **Java** (very good), experience using frameworks (Spring, Hibernate, PrimeFaces-JSF, servers: Glassfish, Tomcat); C#/ASP.NET, JavaScript. Certain experience as well with C++, Python.
- Experience with fullstack **web development** (JavaScript, HTML5, CSS3, frameworks like Angular, Bootstrap, Express). Currently training on ReactJS – React native – NodeJs frameworks (fastify, loopback).
- Familiar with **relational** databases (Postgre, MySQL, SQL server) and **no-SQL** (MongoDB).
- Experience developing **mobile applications** (Android native & Ionic multi-platform).
- Experience working under **agile methodologies** (SCRUM, XP).
- Development of microservices/**REST APIs**.
- **Data** profiling, analysis, **ETL** scripting & execution, results reporting (readability).
- Solid **client-interaction skills** (collecting requirements, asking the right questions, negotiating feasibility).

ADDITIONAL INFORMATION

Aside from software, I am an avid sportsman, specially interested in football, tennis and road cycling (all of them which I practice regularly). I also spend part of my time reading, either fiction or tech blogs (like Medium), learning about new, modern programming trends, languages or frameworks by myself, and even explore different ideas and projects to freelance.

I consider that my strengths beyond any technical skill are a natural ease to learn and adaptability. I have an open mind in regards to tackling new challenges, a strong sense of responsability and professionalism and will to work hard to achieve my goals.

Unrelated to software development, I'd like to add that I worked in a store for 7 years, so I consider it gave me a solid background in a series of aspects such as interaction with the client, management or accountability. I do not possess any other citizenship other than Argentinian nor any visa. Availability to relocate.
